TAKE THE K-TOOL KO CHALLENGE!

Get the "K-TOOL KO Challenge Kit" . . .

And give your customers a ringside for the "K-TOOL KO Challenge" – a 5/8" wrench from Snap-On (we'll call the champion, for now), the second place competitor of the time, and of course ours (currently, the contender). It's simple. Look at them. Same quality. Same functionality. Feel them. Some will say the Snap-On feels better in their hands. But the difference, they will admit is small. The price difference, however is big. K-TOOL is substantially lower. It is rare for someone with a ringside seat to put their money anywhere, but on the challenger – K-TOOL. What can we say, that's who we are. We're not champions yet, but we're giving the competition a helluva beating. Call your K-TOOL rep today and get your "K-TOOL KO Challenge Kit." And give your retailers a ringside seat.

Air Tool Warranty Information

K-Tool International air tools are warranted against defects in workmanship for one (1) year from the date of purchase*. We will repair or replace, at our option, any defective part or unit which proves to be defective in material or workmanship within the warranty period. Should an air tool fail within the first 30 days after purchase date, it may be returned to the place of purchase for a free replacement*. The foregoing obligation is K-Tool International's sole liability under this or any implied warranty, and under no circumstances, shall it be liable for any incidental or consequential damages.

This warranty applies to the basic tool. It does not apply to normal wear and tear on attached accessories/consumable products, such as drill chucks, backing pads for sanders, punch and die for nibblers, air hammer retainers, spray gun cups or "kit" accessories, etc.

*Repairs required as a result of abuse, misuse, damage or repair attempts made by others are not covered by this warranty.

DVT – Dual Valve Technology Multi-Vehicle-Application Sensors

DVT-Sensors are designed to work with either a rubber snap-in valve stem or the metal clamp-in valve stem. The technology makes the DVT-Sensor very versatile. It's easy to match the valve style on TPMS equipped vehicles without requiring an additional part number. Just remove the DVT snap-in or clamp-in stem and replace it with the required valve.

DVT-Sensors for domestic applications are supplied with the rubber snap-in valve stem. Asian and European applications are supplied with the metal clamp-in valve stem.

DVT-Sensors provide over 90% coverage for Domestic, Asian and some European cars and light trucks.

Multi-Vehicle Applications

DVT-sensors have the ability to work on more than one vehicle application. Each DVT-Sensor contains multiple vehicle protocols which provide a wider range of coverage. One DVT-Sensor can replace many OEM sensors.

TPMS Solutions

The OEM requires that the valve stem components are replaced every time the tire is serviced on vehicles with TPMS.

Clamp-in Kit Component	Replacement Reason	Result
(A) Grommet/seal	Crack, deteriorate and leak over time	Leak path at valve stem
(B) Hex nut	Plating worn off, threads corrode	Leak path at valve stem
(C) Valve core	Nickel plating strips leading to galvanic corrosion and seized valve cores	Leak at valve core, potential broken valve stem
(D) Valve cap w/seal	Valve cap seal wear	Allows moisture into core
(E) Metal washer (some applications)	Washer conforms to rim during installation	Leak path at valve stem
Snap-in Kit Component	Replacement Reason	Result
(F) Rubber TPMS snap-in valve	Crack, deteriorate and leak over time	Leak path at valve stem

Refer to manufacturer's specifications for proper torque requirements when replacing hex nuts and valve cores. These specifications can be found in the Dynamic TPMS Service Kit Application Guide.

ABDDY-TPMS-16VS Valve Stem Assortment

For the replacement of corroded or broken TPMS valve stems. The ABDDY-TPMS-16VS assortment contains 16 of the most popular valve stems.

European TPMS Aftermarket Replacement Valve Stems

The OEM has two different designs of replaceable valve stems with their TPMS sensors – Generation I and Generation II. Gen I and Gen II valve stems utilize a different thread pitch and therefore the service repair kits use different components and cannot be interchanged. The difference in the valve stems and the service kits is detailed below.

Generation I

Dynamic Valve Kit w/ Valve Stem	Dynamic Service Kit w/o Valve Stem	OEM No.	Valve Length	Color Coded Noted at Base of Valve Stem
ABD6-220	ABD6-110	RDV001	43 mm	Silver

Axle Drain Pan

- Durable and lightweight HDPE plastic with built-in drop proof spouts that help to recycle oil
- Works for most dual and super single wheels, sizes 22.5 and 24.5
- Use with steel and aluminum wheels, hub piloted or stud piloted, drive or trailer axles
- Catches oil, axle nuts, bearings - most anything removed from the wheel end for service
- Attaches with a hand-tightened lug nut

Drain pan works for most dual and super single wheels sizes 22.5 and 24.5. Attaches with a hand-tightened lug nut. Will not tip or spill - virtually eliminating clean up. Works for steel or aluminum wheels, hub piloted or stud piloted, drive or trailer axles. Catches oil, axle nuts, bearings - most anything removed from the wheel end for service. Built in drop proof spouts help to recycle waste oil. Durable and lightweight HDPE plastic.

Antifreeze Tester**

- Hydrometer immediately and accurately tests strength of all permanent solutions (ethylene glycol), with engine hot or cold, and includes temperature adjustment scale for accurate interpretation of mixture strength
- Assists in preventing winter freezeup and summer boilover
- Two embedded scales show freeze point of radiator solution and boiling point of summer coolant
- 32°F thru -45°F

**KTI70212
Battery Tester**

- Hydrometer immediately and accurately tests battery life whether battery is hot or cold
- Helps extend battery life and detects overcharge
- Assists in preventing dead batteries
- Works on all 6-, 12- and 24-volt systems

**KTI70210
Carbon Pile Load Tester 500 AMP**

- KTI's 500 AMP carbon pile load tester is great for simulating actual cranking loads
- It tests 12 volt batteries rated as high as 1000 CCA or 160 AMP hour
- Quick 15 second test cycle with audible tone to indicate test completion
- Unit can also test alternators, regulators and starters
- Carbon pile load tester features 500 AMP side clamps and heavy-duty stranded copper cables
- The large, color-coded dual meters make the unit easy-to-use
- Also includes temperature compensation chart
- 1-year warranty; Repair or replace at discretion of repair center

**KTI70215
Battery Tester 100 AMP**

- Extremely handy and portable way to load test suspected low charging batteries
- Internal 100 AMP loading capacity
- Test 6- and 12-volt batteries
- Tool checks battery voltage, starter current draw, charging voltage and battery condition
- Features extra-heavy nickel-plated ventilated case, heavy-duty cable, copper-plated clamps, and load safety switch to prevent arcing
- 1-year warranty; Repair or replace at discretion of repair center

**KTI70216
Digital Battery Tester 125 AMP**

- Extremely handy and portable way to load test suspected low charging batteries
- Internal 125 AMP loading capacity. Digital voltage indicator with LED battery status
- Tests 12-volt batteries on or off the vehicle. Load safety switch prevents arcing
- Features extra-heavy nickel-plated ventilated case, heavy-duty cable, copper-plated clamps, and load safety switch to prevent arcing
- 1-year warranty; Repair or replace at discretion of repair center

Patented AccuTorq® strobe marks stop turning at precisely the correct torque EVERY time. There is NO guess work and no recalibration. Solid one-piece construction of AccuTorq® automotive and commercial truck sockets eliminates the wide torque variances unavoidable with socket extensions and adapters. Features deep well sockets for those special applications where regular socket depth is just not enough. AccuTorq®'s ultrasonic inspection of EACH socket and its ISO 9001 quality certification of manufacturing processes, make it possible for each AccuTorq to come with a lifetime guarantee. Vehicle Specialty I Drive Shaft & Axle

KT170390 MEGAHAMMER® 3-Piece Set

- Saves time and money while servicing 3/4 and 1 ton Chevrolet and Dodge pickups with Dana axles
- Unique 4-6-8 bolt head will accommodate most trucks
- Removes seized hubs & rotors
- Eliminates damage removing captured rotors
- Cut the job in half

The MEGAHAMMER™ is the ultimate contender for all your tough jobs. A must have tool to service all 4 - wheel vehicles with captured rotors. Use it for: Rotor Replacement, Hub and Bearing Work, Axle Service, and Ball joint service.

Over the years rust and corrosion will build up and make removal of a seized bearing assembly almost impossible. Technicians are left with little recourse other than time consuming and labor-intensive measures to attempt to remove the seized bearing assembly. Most methods of removal employed today risk damaging the vehicle which in turn will increase repair costs.

The MEGAHAMMER™ tool's unique, patented design cuts repair time in half by employing a less labor-intensive process and greatly reduces the risks of damaging the vehicle. The size and capabilities of MEGAHAMMER™ make even the most formidable jobs seem easy. Many shops will not provide service to 4-wheel drive vehicles with captured rotors because of the costs and risks involved.

CAUTION: Lock nut on hub removal tool must be tight to protect against thread damage. Slide shaft thread to be engaged into base late thread so it is flush with inside edge of base plate thread. Use countersunk holes ONLY for proper grip on studs. Use outboard support to help prevent tool and wheel assembly from dropping to floor. Do not stand behind tool when in use. Tool is heavy. Use extreme caution when lifting. Keep extremities clear of pinch points. Always wear eye protection when using hub removal tool. Locking pin must be in place when not in use. Not responsible for damage to vehicle.

WARNING: Please follow instructions carefully to reduce risk of personal injury or possible damage to the vehicle.

3" Display Extension Bar

Add more room to any display with the 3" extension bar. Larger product can be displayed behind the display bar with plenty of clearance for easy shopping and visual appeal. Place smaller product on the extension to maximize display space and sales!

KT1098
Blank Display Board

Display boards can be used with any of the display overlay and merchandising kits or to create customized in-store merchandising programs. Blank display board measures 23.5" x 32".

KT1001
8-board
Rotary Merchandiser

KT's rotary merchandiser is the perfect way to display a maximum amount of product in a minimal amount of space. Rotary merchandiser will hold up to eight (8) displays! The rotary display requires a minimal amount of space - only 36" x 36". Display is complete with four (4) durable casters for added mobility. A must-have for professional, effective merchandising. Boards (KT1-098) sold separately.

*NOTE: Some displays are not recommended for use on the rotary merchandiser due to weight restrictions.

KT1004
Acrylic Counter Display

Acrylic counter display features a 15-11/16" x 15-13/16" display area to maximize product exposure. Compact design requires a minimal footprint (8" x 15-11/16"). A great way to generate 'impulse' buys. Utilizes 'dead' space behind point-of-sale terminals or computer monitors for additional merchandising area. Featuring two heightadjustable legs, the display area has a tilt range from 75-degrees to 87-degrees.

AIR TOOL WARRANTY POLICY

ONE (1) YEAR LIMITED WARRANTY *30 day over-the-counter replacement

Requirements for all warranty repairs:

- Proof of purchase - Sales receipt must accompany all repairs.
- Warranty card must be on file within 30 days from date of purchase.

K-Tool International air tools are warranted against defects in workmanship for one (1) year from the date of purchase*. We will repair or replace, at our option, any defective part or unit which proves to be defective in material or workmanship within the warranty period. Should an air tool fail within the first 30 days after purchase date, it may be returned to the place of purchase for a free replacement*. The foregoing obligation is K-Tool International's sole liability under this or any implied warranty, and under no circumstances, shall it be liable for any incidental or consequential damages.

This warranty applies to the basic tool. It does not apply to normal wear and tear on attached accessories/consumable products, such as drill chucks, backing pads for sanders, punch and die for nibblers, air hammer retainers, spray gun cups or kit accessories, etc.

*Repairs required as a result of abuse, misuse, damage or repair attempts made by others are not covered by this warranty.

Do NOT, under any circumstances, attempt to repair or make any adjustments on your tool, as this will VOID your warranty.

Suggested instructions for maximum air tool efficiency:

- Your tool should be oiled daily when in use with a non-detergent type oil. Manufacturer recommends 4 - 5 drops of type A transmission oil or air tool oil be applied through the rear inlet. If possible, a fog type oiler is recommended.
- Check your compressor daily for excess water. Moisture greatly affects the efficiency of tool operation and may void warranty.
- Use recommended air pressure (not to exceed 90 psi). For maximum performance, air compressor must be capable of maintaining approximately 90 psi.
- 3/8 air hose and fittings are recommended for optimum operation of tools. 1/2 air hose for 3/4 or 1 impact wrenches is required to maximize performance.
- An oil/water extractor is necessary for spray guns.

Notice: Warranty repair will not be performed on a spray gun that has not been cleaned. Item must be cleaned before it is sent for repair, or spray gun will be returned collect, with no repairs performed.

Should you experience a problem within your warranty period, ship prepaid to:

SAFETY INFORMATION

For your safety, please read and understand the following safety guidelines.

Never misuse a tool. Improper use of a tool will shorten its life.

ALWAYS wear safety goggles to protect eyes. Keep your tools clean.

Never use a broken tool. Keep all tools out of the reach of children.

AccuTorq®:

Wear protective goggles. Never hold with hands while tightening. Never use torque sockets to remove lug nuts. When tightening lug nuts, use the criss-cross wheel nut tightening sequence.

Grinders, Grinding Wheels and Air Tool Accessories:

Wear protective goggles. Do not operate power tools at speeds that exceed their maximum rated rpm. Power tool accessories can break, causing particles to fly. Avoid injury by using eye shields and guards.

Hammers:

Wear protective goggles. Always use a hammer that is suitable for the job. Head diameter should always exceed the object being struck, such as a punch or chisel. Do not strike a tool that shows distress.

KTIp.s.t.® TPMS Activation Tool

Product emits magnetic and electromagnetic waves that may interfere with the safe operation of pacemakers. Individuals who have pacemakers should never use this product. Do not use any harsh chemical solvents to clean tool. Do not use tool where contact or immersion in water is possible. Never spill liquid of any kind on the tool. Do not use or store the tool where it is exposed to direct sunlight or excessive moisture. Do not operate tool in the vicinity of open containers or flammable liquids. Do not operate tool with battery cover removed.

Lifting Equipment:

Do not exceed the rated capacity of jack or jack stands. Use jacks only on strong level surfaces. Collapse of lifting equipment can cause serious injury. Do not work on a vehicle supported by a jack, use jack stands.

MEGAHAMMER®:

Lock nut on hub removal tool must be tight to protect against thread damage. Slide shaft thread to be engaged into base plate thread so it is flush with inside edge of base plate thread. Use countersunk holes ONLY for proper grip on studs. Use outboard support to help prevent tool and wheel assembly from dropping to floor. Do not stand behind tool when in use. Tool is heavy. Use extreme caution when lifting. Keep extremities clear of pinch points. Always wear eye protection when using hub removal tool. Locking pin must be in place when not in use. Not responsible for damage to vehicle.

Pliers:

Wear protective goggles. Broken tips or cut material can fly.

Power Tools:

Wear protective goggles. Always read instructions before using a power tool. Flying particles can cause injury. Use hearing protection when exposed to noise for prolonged periods of time. Do not misuse power tools.

Prybars:

Wear protective goggles. Do not strike a prybar. Prybars may cause loose material to fly. Do not use if chipped or cracked.

Pullers:

Wear protective goggles. Be sure that center screw threads are clean and well lubricated. Be sure the puller is seated properly, do not use on an angle. Do not overstress the puller, always use the largest size possible to do the job efficiently. Never use a puller with worn or damaged parts.

Punches/Chisels:

Always wear protective goggles. Regrind a dull chisel to its original shape when the cutting edge becomes dull. Use a punch or chisel holder to prevent injury. Never use a broken punch or chisel.

Ratchets:

Ratchet mechanism may slip or break if parts are worn or dirty. Frequently clean and lubricate.

Screwdrivers:

Wear protective goggles. Never use a screwdriver for prying, punching, chiseling or scraping. Be sure tip width and thickness are appropriate for slot size.

Sockets (Hand):

Wear protective goggles. Be sure to always choose the appropriate type of socket based on its application. Do not use hand sockets on power tools.

Sockets (Impact):

Wear protective goggles. Flexible sockets and swivel joint tools rotate under power during use and should not be held. Using broken tools can cause serious injury.

Spray Guns:

Wear protective goggles.

Tie Downs/Stretch Cords:

Wear protective goggles when stretching, fastening or releasing hooks. A rebounding hook is dangerous. Do not use if product appears frayed or worn, or if the hook has been bent or otherwise tampered with. Do not stretch a stretch cord beyond 50% of its unstretched length. Do not expose to extreme stress or incorrect use. Do not exceed the maximum working load.

Tow Straps/Ropes:

Do not expose to extreme stress or incorrect use. Working load requirement should be evaluated by user before choosing the appropriate assembly. Always check anchor points. Never use if webbing is worn or frayed.

Wrenches:

Wear protective goggles. Do not over-torque. Avoid excess force on crowfoot or flare nut wrenches. Always use correct size.
